Benefits Analytics with Steve Jenner

Monday 13th November 8:30am-12:00 noon. Venue: Ministry of Education, Level 2, 33 Bowen Street, Wellington. $90+gst. **Register Here**

This three hour session on benefits analytics, with a discussion on social benefits, will help benefits professionals support investments to have the greatest possibility of realising and optimising the benefits promised.

Successful benefits management starts by correctly identifying and determining benefits measures. As we move towards a more customer-centric Government sector where benefits are shared cross-agency, it is even more important to be able to assess and measure benefits effectively and consistently.

Who Should Attend?

- Project and Programme Managers
- Business Analysts responsible for developing/ measuring benefits

About the Facilitator: Stephen Jenner – Practitioner, Author & Trainer

Steve has practical experience as a former senior UK civil servant and consultant. He designed, implemented and operated the Criminal Justice System IT approach to Portfolio and Benefits Management that has been recognised internationally. He was described by the UK Government CIO as the, "*rottweiler of benefits management*". Steve is the author of a number of books on Benefits Realisation and Project Portfolio Management including "Managing Benefits', for which he is the Chief Examiner. Additionally, he co-authored 'Management of Portfolios' on behalf of the UK Office of Government Commerce. He currently develops and delivers Masters level courses for the Graduate Business School at QUT, as well as delivering project management courses at a number of other business schools around the world. Steve is a professionally qualified management accountant, fellow of the APM, with an MBA and Masters of Studies degree from Cambridge University.
