

USING ZOOM

STEP BY STEP INSTRUCTIONS

Either:

1. click on the Zoom link you may have been provided with

Or

2. Go to <https://zoom.us/join> and Enter the Meeting ID that you have been provided with in the appropriate field and click 'Join' (the Meeting ID will be a 9 or 10 digit number)

If joining from a mobile Device

If you are joining from a mobile device (Android smartphone/tablet, Apple iPhone/iPad) then it will simply prompt you to download the Zoom Cloud Meetings app from the App/Play Store.

See [here](#) for more details

If joining from a computer

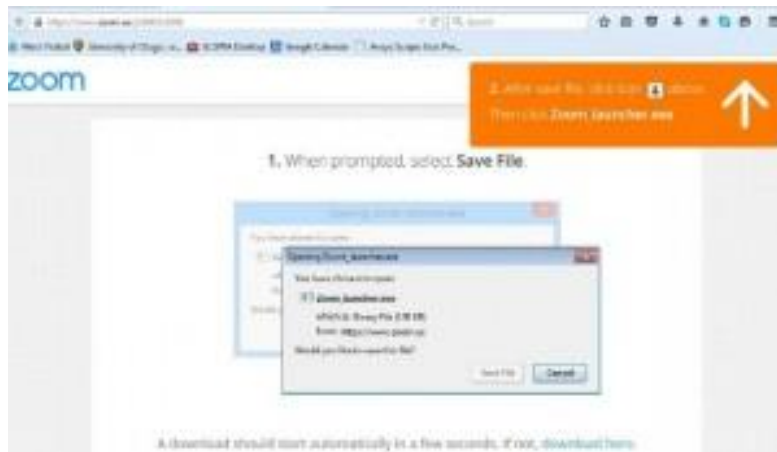

When entering a Zoom meeting for the first time from a computer you will need to download a small application file.

This process is easy to complete on all commonly used browsers. The examples below are shown using Mozilla Firefox and Google Chrome.

NB. At the bottom of the page though there is a line "If you cannot download or run the application, join from your browser" which can be used instead.

Mozilla Firefox

Click 'Save File' and follow the instruction in the orange box.

Google Chrome

Google Chrome should automatically download the file and point to it as shown above. Clicking on the Zoom_launcher.exe file will install Zoom, there will be a short pause before a blue progress bar appears indicating the installation.

If an 'Application Launcher' or 'External Protocol Request' box appears simply tick the 'Remember my choice...' option box and then click 'OK'

When prompted, select **OK**.

If nothing prompts from browser, try again or [download & run Zoom](#).

When prompted, select **Launch Application**.

If nothing prompts from browser, [download & run Zoom](#).

Just before entering the meeting you will be prompted to enter a display name. This name is simply to identify you in the meeting.

Join Audio via Computer

You will then be prompted how you wish to join your audio. If you wish to join audio via the telephone, follow the instructions further down, otherwise simply select Join Computer by Audio (TIP: by ticking the “Automatically join audio by computer...” option box first, will mean you won’t get prompted again in the future)

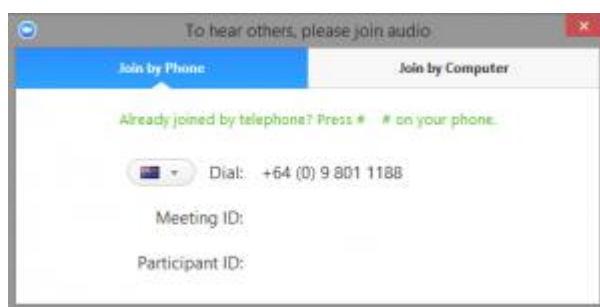

Join via Computer & Audio via Telephone

It is possible to use a combination of computer for video and phone for audio.

If you use this option, then enter by computer first and select the **Join By Phone** tab when the audio pop-up window appears (see example below). This will display the NZ dial in number for you (or you can change it to display one of the many other countries which have a “local” dial in number by clicking on the flag icon), as well as the Meeting ID to enter and your Participant ID.

Dial in as noted above, however after entering the Meeting ID, you will be prompted to enter your Participant ID. Simply enter this number followed by # and your video and audio will then be synchronised.

Raising Your Hand

As the non-speaker if you wish to ask a question or make a point during a meeting it is good protocol to use the ‘Raise Hand’ facility.

If the tool bar is not showing at the bottom of the Zoom window, place your cursor over the Zoom window so it appears and select the ‘Participants’ icon.

A window listing other participants will appear, there is also a 'Raise Hand' icon, click the icon to make it known to the Host that you would like to raise your hand.

If you wish to lower your hand, click the 'Lower hand' icon that will have replaced the 'Raise hand' icon.

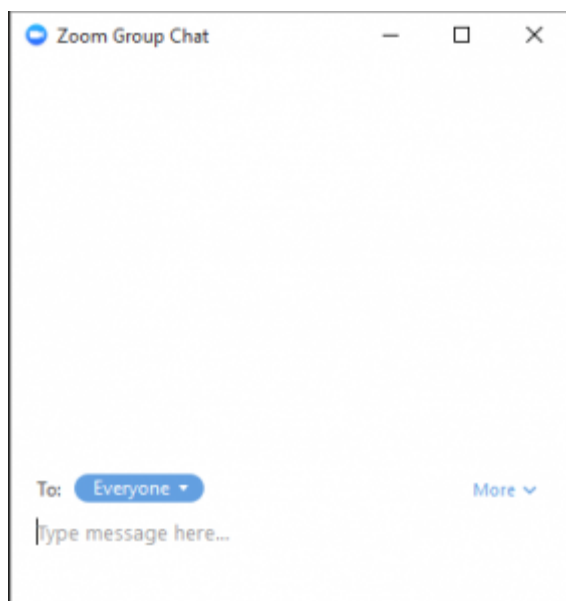

Using Chat

You can use the 'Chat' facility to send text chat to all participants or privately to specific participants.

Click on the 'Chat' icon in the tool bar; again hover your mouse over the Zoom window if you can't see the tool bar.

A chat window will then open. Select 'Everyone' or the name of the person you wish to send a chat message to.

Audio only

It is possible that during the conference participants will be asked to turn off their cameras and move to audio only, particularly if there are problems with the available bandwidth.

To do this simply click on the camera icon at the bottom of the Zoom window.
