

## PRE-PAID TRAINING SPACES: BUY IN BULK AND SAVE!

Our **pre-paid training spaces purchase** is a popular option which **saves our clients both money and admin time**. If your organisation has a minimum of 10 delegates who require training to Practitioner level in a variety of certifications/locations, this is a great option worth considering.

Note, if you have a group of delegates who require training in the one location and for the same certification (to either foundation or practitioner level) you may wish to consider our private classes run onsite.

### ABOUT US

CC Learning is a boutique training company which has been offering PRINCE2® training and mentoring around the world since 2003. Since then, we have expanded our offerings and are now accredited in and offer public/private courses in a variety of project, programme and portfolio training products (see range [here](#) on our website) We are an AXELOS accredited ATO through the official accreditation institute, PeopleCert . We are also an APMG accredited ATO. Our courses and trainers gain great feedback, see link [here](#) for reviews on our website.

### HOW IT WORKS

We offer a special price **per space for a minimum of 10 F&P spaces**, and these can be used for any of our F&P public training classes, in any location, and for any course dates spread out over the following 12-18 months. There is an expiry date but we are happy to discuss extensions usually at no charge if needed.

If this is of interest to your organisation, we can discuss pricing, and will then offer an agreement and invoice to suit. Once the agreement is signed and the invoice fully paid, you may begin allocating these spaces by registering delegates for our courses, via our online forms or by emailing our Course Admin team.

As each booking has been pre-paid, we will confirm the training immediately and issue our Joining instructions confirmation email and course pack to your delegates so they can begin their pre-course preparation. Usual Terms & Conditions for our public courses apply.

We track allocation of these spaces and can offer a usage report upon request.
